# INTRODUCING

This IP68 fitting is designed for durability in harsh environments and available for Zone 1/2 as well as Zone 21/22.

**Our EX Pod** is the perfect combination of durability and output. Housed inside an impact resistant polycarbonate tube and available for Zone 21 and 22 locations which are hazardous because of the presence of combustible dust and fibers and Zone 1 or 2 which are hazardous due to the presence of combustible liquids or gases.

**Our EX fittings are manufactured** using approved EX technology sourced from the leading component manufacturers in Europe. We then put the new luminaries through months of testing to ensure that the final product could deliver against our exacting specifications.

**The final result**, an EX light several years in the making, yet on the very tip of the latest technological advancements in LED EX light technology, available today.

## KEY FEATURES

### MODULAR

- With extra Lumen Packages up to 21000 lm.

### 4 SIZE OPTIONS

- EX Pod 1350mm
- EX Pod 1630mm
- EX Pod 1910mm
- EX Pod 2190mm

### CASING

- Impact rating IK08/5J

### TEMPERATURE

- Ambient room temperature -25°C to +40°C.

# Specifications

Select the perfect one for the job

**kV Protection:**  
4kV, 10kV on request

**5000K standard**  
3000K, 4000K,  
6500K available  
CR>80 R9>13

**Indoor /  
Outdoor**

**Impact  
Resistance:**  
IK08/5J

**Casing  
Diffuser:**  
Polycarbonate

# Distribution Options

The light you need, where you want it.

**EX Pods protect your LEDs**, and offer light onto a specific area, surface, or object. Floodlighting is a basic element of both interior and exterior lighting. These indoor luminaries are not only able to project a wide spread of light, with the use of lenses we can also provide task lighting.

Task (focused) lighting provides increased light for specific tasks in a room that may already have some ambient light. Task lighting is especially useful for seeing small objects or objects of low contrast. We can offer solutions to combine several pods to get the exact lighting you require.

Wide (Frosted)

Wide

Medium

Narrow

## A Closer Look

Engineered to the highest standards.

### Housing

Designed & engineered using polycarbonate for harsh environments.

### Driver

Only the highest quality drivers from Europe with F3, 4kV, 100K hours. Driver can either be housed within the LED tube or piggy backed in a separate tube above the LEDs.

### LEDs

Source from the best component manufactures in Europe to ensure maximum lifespan, quality and light spectrums.

# Installation & Configurations

Easy to install , **Saving** you time & money

## Pendant mounting

Slick, rubberised, easy to install.

**Banking / Stacking** - For increased lumen output.

**Remote Driver / Control Gear** - Piggy back configuration for uninterrupted light.

### Disclaimer:

Although every effort is made to ensure that at the time of publication, the technical details here within, are accurate, true and in line with the latest production specifications, we do reserve the right to change or upgrade any of the details without prior notice, agreement or warning, for any of our products or components.

Our products and their performance are in constant evolution through:

- technology upgrades to improve energy efficiency and performance, increased safety and cost effectiveness

- to comply or conform to suppliers updates or according to new safety standards.

The true nature of any upgrade is always to provide a better product, therefore, there will be no recourse for any complaints or claims of any nature regarding changes to specs.

We are ISO 9001-2015 compliant and our assembly line follows IEC 60958 guidelines – our products are covered by a Product Liability Policy.

Our LED products are covered by a 5 year warranty\*

# Extras

## Optional Extras

Excellent luminous Efficacy (Lm/W)

IES files available.

*Effective lumen output after warmup:*

*We follow the same practice as other professional manufacturers in providing Effective Performance Data (Lumens, Watts and L&B) that are inclusive of driver and LED thermal losses during the warm-up period. This can only be achieved by performing the Energy and Photometric Measurement after the LED, within the fitting, is left ON, until a stable and constant Lumen output is reached, ie. reaching a thermally stable condition within the LED assembly at a Ta of 35°C.*

*Unfortunately it's not uncommon to find suppliers using incomplete data suggesting Efficacy Lumen value to be 10 to 20% higher than the True Effective value.*

*This misrepresentation is achieved by using Raw LED photometric data that does not include any of the driver losses (generally 2-5 %) and any thermal adjustment losses (this can take 20-240 min & account for 7-15%)*

*In some extreme cases Effective Lumen is completely misquoted and only the Raw value is mentioned with much higher values.*

*In both these cases True Effective Lumen is misrepresented and unlawful.*

Temp: 35°C

### EX

**EX Bay XP**  
Factories, Warehouses,  
Mills, Marine etc.

Standard  
Height: 17m  
IP: 65  
Temp: 40°C

**EX Flood**  
Factories, Warehouses,  
Mills, Marine etc.

Standard  
Height: 10m  
IP: 65  
Temp: 40°C

**EX DUSTPROOF PREMIUM**  
Warehouses,  
Car parks, Mills.

Standard  
Height: 8m  
IP: 65  
Temp: 40°C

**EX DUSTPROOF**  
Warehouses, Car parks,  
Corridors, Mills.

Standard  
Height: 8m  
IP: 65  
Temp: 40°C

**EX Pod**  
Factories, Mines,  
Marine etc.

Standard  
Height: 5m  
IP: 68  
Temp: 40°C

**EX Torch**  
Heavy industrial areas.

Standard  
Height: 10m  
IP: 65  
Temp: 40°C

### EARTH

**EARTHbay**  
Horticulture, Open  
areas etc

Standard  
Height: 2.5m  
IP: 65  
Temp: 35°C

**EARTHplate**  
Horticulture, Rack/  
Under shelf etc

Standard  
Height: 0.5m  
IP: 65  
Temp: 35°C

**EARTHpod**  
Horticulture, Propagation,  
Vertical, Racks etc.

Standard  
Height: 0.2m  
IP: 65  
Temp: 35°C
