

CHANNEL DRESSING

ALSO AVAILABLE IN WHITE

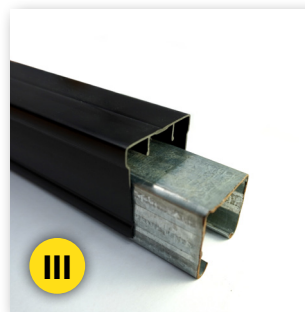

Channel Dressing is an innovative solution that enhances the appearance of P2000 trunking, transforming it into a sleek installation without needing painting or removal. It is easy to install on-site with minimal tools, requiring only a good eye, a step ladder, and scissors. In addition to its aesthetic benefits, it includes three dedicated cable channels for managing additional wiring, ensuring ample space regardless of the trunking's orientation. Designed to complement MAGfit and Highlight light fittings, Channel Dressing combines design, practicality, and innovation to upgrade any space effortlessly.

I
Use Channel Dressing to cover old P2000.

II
Open the dressing and place over the P2000.

III
The dressing allows space for cables.

IV
Adjust the dressing to the ideal placement.

Channel dressing can be applied on both sides of the trunking to achieve a full cover-up. This ensures that the trunking is completely covered on all sides.

The casing provides 3 channels for any additional cables
