

X-Fit

Click on. Click off. No tools solution.

Our X-fit linear retail solution offers a magnetic or clip attachment for seamless integration with P2000 trunking, reducing installation time on site. The product leverages our established ledrail technology and boasts 8 lens options, premium European components, and is designed and developed by our South African R&D team, with a focus on African resilience. Thanks to our unique channel dressing technology, the X-Fit allows for complete and simple customization for new or existing P2000 trunking to compliment your design asthetic (on request).

Better light
through research.

Crossing the divide between lights & light.

Built to outperform in form & function.

The X-Fit offers a sleek modular design combined with high-powered lumen output and refined optics. It's also been designed to be installed with enough speed to make an F1 pit team blush.

Don't let its sleek lines fool you. This luminaire is as rugged as it is refined with up to 12kV surge protection & comprised of the highest quality Italian and German components.

CHANNEL DRESSING

With our channel dressing technology new or existing P2000 trunking can be colour coded in a heartbeat to a slick & easy to install finished product.

KEY FEATURES

MODULAR

- Manufactured to seamlessly fit into any linear geometric shape

LENSES

- 8 different acrylic optics for multiple lens combinations.

5 SIZE OPTIONS

- X-Fit 102 560 x 50mm
- X-Fit 104 1400 x 50mm
- X-Fit 106 1700 x 50mm
- X-Fit 108 2250 x 50mm
- X-Fit 110 2800 x 50mm

MOUNTING OPTIONS

- P2000 Compatible (P2000 not included)

Optional:
Bluetooth, Wifi,
Dali & Bi Level.
Casambi App

A new range of performance for the X-FIT

To meet the diverse needs of different industries in terms of price, efficiency, and performance, we have developed four distinct performance ranges: **Max**, **Pro**, **Core**, and **Eazy**. Each range is carefully designed to address specific requirements, offering the right balance of features, energy efficiency, and cost-effectiveness.

Whether you're looking for high-performance solutions, reliable everyday lighting, or budget-friendly options, our four ranges provide tailored choices to ensure you get the right fit for your application, without compromise.

Max

Top-of-the-Line Performance for Demanding Applications

Suitable ta (ambient temperature): Up to 35°C. Higher ta on request.
LEDs: Ultra-high output, high CRI, top-tier efficacy
Drivers: Premium-grade (100Khr, F3)
Lifespan: 90,000Hrs L80B20 or 50,000Hrs L90 B10
Effective and stable system efficacy: up to 185 lm/w
Ideal For: Warehouses, factories, large retailers, 24/7, 365 operation
Warranty: 7 years extended warranty optional
Fully serviceable

Pro

Reliable Performance with Excellent Return on Energy

Suitable ta (ambient temperature): Up to 35°C. Higher ta on request.
LEDs: High-quality, reputable brand, high CRI, with excellent durability
Drivers: High-grade, ideal for retail and commercial use including F3 & F10 (100Khrs)
Lifespan: 75,000Hrs L80B20 or 35,000Hrs L90 B10
Effective and stable system efficacy: up to 165 lm/w
Ideal For: Supermarkets, commercial centers, retail franchises, 24/7, 365 operation
Warranty: 5~7 years warranty
Fully serviceable

Core

Cost Effective Durability with Reputable Components

Suitable ta (ambient temperature): up to 35°C. Higher ta on request.
LEDs: Economical but reputable brands
Drivers: Good quality, balanced between cost and performance F10 (up to 100Khrs)
Lifespan: 50,000Hrs L80B20 or 30,000Hrs L90 B10
Effective and stable system efficacy: up to 150 lm/w
Ideal For: General commercial and industrial use
Warranty: 5 years Standard
Fully serviceable

Eazy

Affordable and Reliable: Designed to Outperform Generic Imports

Suitable ta (ambient temperature): Up to 35°C. Higher ta on request.
LEDs: Same as Core (reputable source)
Drivers: ECONO range - economic but from trusted suppliers F10 (up to 100Khrs)
Lifespan: 50,000Hrs L70B20 or 25,000Hrs L90 B10
Effective system efficacy: up to 150 lm/w but smaller lumen package
Ideal For: Budget-conscious projects, retrofits, light-use areas
Warranty: 5 years Industry-standard, fully backed, ideal for 24/7 365 operation
Key Advantage: Engineered to exceed the performance of most generic imports, traceable quality Engineered for affordability.
Fully serviceable

Ease of Installation, No tools required, facing up or facing down.

Designed for easy maintenance with a versatile mounting system
Choose between magnetic attachment or clip-on installation.

The clip system uses durable stainless-steel clips,
while the magnetic version secures effortlessly with strong magnets.

CHANNEL DRESSING FOR P2000 FACING UP

ALSO AVAILABLE IN WHITE

Channel Dressing is an innovative solution that enhances the appearance of P2000 trunking, transforming it into a sleek installation without needing painting or removal. It is easy to install on-site with minimal tools, requiring only a good eye, a step ladder, and scissors. In addition to its aesthetic benefits, it includes three dedicated cable channels for managing additional wiring, ensuring ample space regardless of the trunking's orientation. Designed to complement X-fit and Highlight light fittings, Channel Dressing combines design, practicality, and innovation to upgrade any space effortlessly.

I
Use Channel Dressing to cover old P2000.

II
Open the dressing and place over the P2000.

III
The dressing neatly conceals all cluttered cables.

IV
Adjust the dressing to the ideal placement.

Channel dressing can be applied on both sides of the trunking to achieve a full cover-up. This ensures that the trunking is completely covered on all sides.

The casing provides 3 channels for any additional cables

Distribution Options

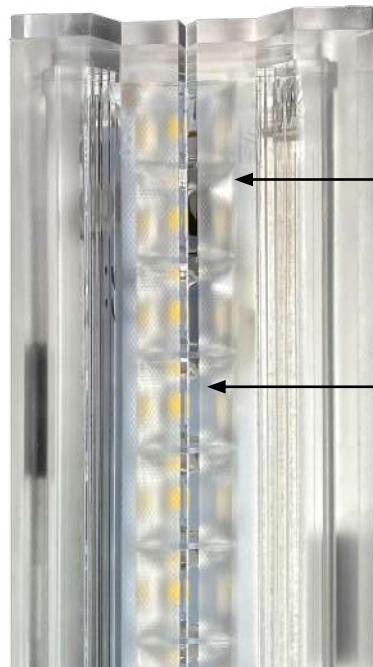

The light you need, where you want it.

The development of high-quality optical lenses has changed the lighting game. Gone are the days of naked bulbs throwing out in a wide light spray covering everything from the ceiling above to the walls no one needs to see. With today's advancements in lens efficiency, we are able to put the light where you need it most providing you lux levels on both vertical and horizontal planes.

In so doing we can provide solutions for shelving or walkways, for punching deep through high-racks or throwing wide beams across open spaces. With these technologies, the only time you have dark spots is if you intentionally wanted to.

A Closer Look

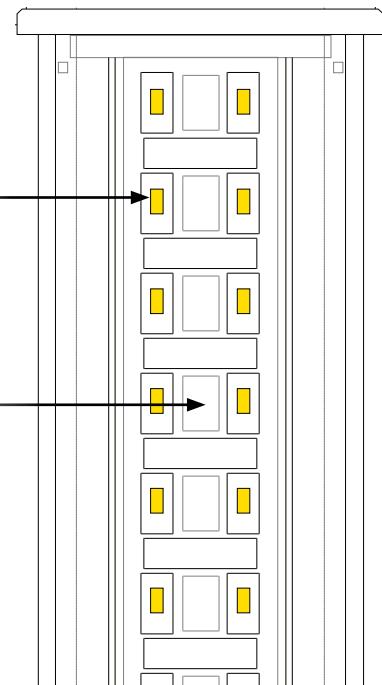

Engineered to the highest standards.

Lenses

PMMA Optic available as 30°, 60°, 90°, 110°, 90° TL, Symmetrical narrow retail, Symmetrical wide retail, Asymmetrical.

LEDs

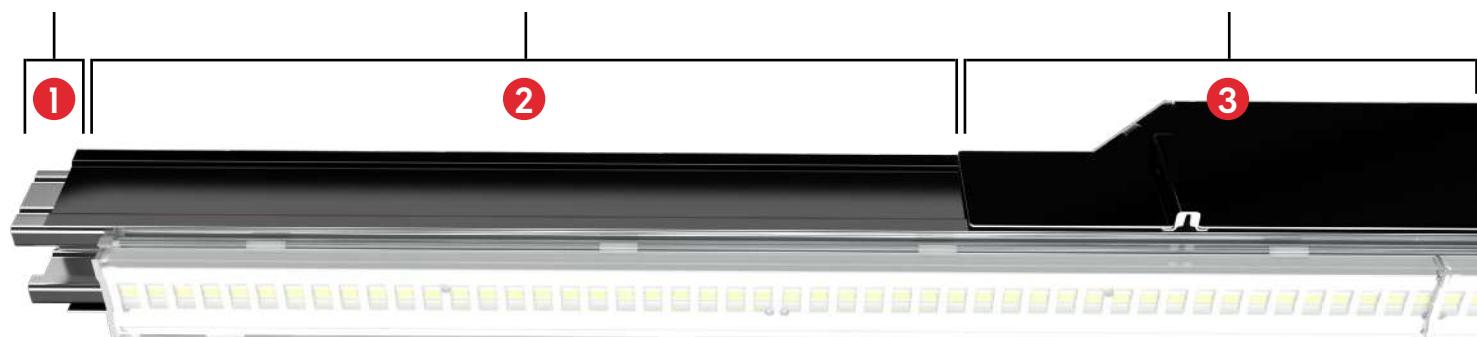

Sourced from the best component manufacturers in Europe to ensure maximum lifespan, quality and light spectrums.

Installation

Easy to install, Saving you time & money

1. X-FIT INSTALL AID SPRING

The safety spring is pushed into the P2000 to secure it.

2. Place the open end into the channel. Using two thumbs push the spring until it clicks in.

3. The install aid now holds the X-FIT safely for you to connect X-FIT rails together (see pic 4.) And using the magnets on the back of the rail connect it snugly to the P2000 (not included).

4. Connect the X-FIT rails together with the yellow connectors at the end of the rails. Then attach the rails to the P2000 using the magnets.

The Driver housing has a slot on the side to conceal the cables that take power down to the lights.

Disclaimer:

While every effort is made to ensure the accuracy of technical details at the time of publication, we reserve the right to modify or upgrade any product or component specifications without prior notice. Our products undergo continuous improvements in technology, energy efficiency, safety, and cost-effectiveness to meet evolving industry standards and supplier updates.

All upgrades are made to enhance product quality, and as such, no claims or complaints will be entertained regarding specification changes.

We are ISO 9001:2015 compliant, and our assembly line adheres to IEC 60958 guidelines. Our products are covered by a Product Liability Policy, and our LED products come with a 5-year warranty (T&Cs apply—please contact Head Office for details).

Effective Lumen Output After Warm-up

We adhere to industry best practices in providing accurate Effective Performance Data (Lumens, Watts, and L&B) that account for driver and LED thermal losses during the warm-up period.

To ensure precise measurements, we conduct Energy and Photometric Testing only after the LED within the fitting has been powered on long enough to reach a stable and constant lumen output—achieving thermal equilibrium at an ambient temperature (T_a) of 35°C.

Unfortunately, some suppliers misrepresent efficacy by inflating lumen values 10–20% above the true effective output. This is often done by using raw LED photometric data, which:

- Excludes driver losses (typically 2–5%)
- Ignores thermal adjustment losses, which can take 20–240 minutes and account for 7–15% reduction in output

Given these factors, the actual Effective Lumen Output is often lower than raw values suggest. In extreme cases, some suppliers report only raw LED values, completely disregarding real-world performance.

For transparency and accuracy, we ensure our data reflects true effective lumens, providing reliable performance metrics you can trust.

Features

Standard across the X-Fit range.

Indoor.

Surge protection.

Sustainably Recyclable.

Acrylic Lens.

Serviceable: All units are serviceable and all parts replaceable.

Colour temperature 3000, 4000, 5600 & 6500K
